- Measurement review with prior measurement comparison and trending with Boston, Michigan, mixed or custom z-score options
- Ranked #1 Best in KLAS in Cardiology four consecutive years, 2013-2017

Echocardiography is among the fastest growing and most frequently used procedures in any world class cardiology practice. In order to be effective and competitive, a comprehensive cardiovascular information systems (CVIS) is essential; one that understands how your department's workflow differs based on the patient, and specifically, their age. With mounting concerns over readmissions, lower reimbursements, and fragmented care, there's little time to focus on data management. With this in mind, Merge Cardio™ aims to manage the data in your echocardiography department, so your physicians can see more patients and your practice sees more growth.

Flexibility and depth of information for pediatric echocardiologists

With a full procedure set of capabilities, Merge Cardio fosters business continuity without compromising the depth of information collected in your pediatric echocardiography department. Merge Cardio helps to gather custom data with multiple free text features, so your echocardiologists' reports are complete and accurate. With advanced free text entry, including an abbreviation handler, capitalization manager, and

CardioAnalytics searches which help streamline workflow, your pediatric echocardiologists spend more time with their patients and less on reports.

Efficiency for your sonographer

As an integral member of your pediatric echocardiography team, your sonographer requires the best tools available to complete his/her studies. Merge Cardio's web-deployed workstation, with measurement tools and reporting data entry, allows the sonographer to access the system from anywhere, allowing them to work faster and more efficiently. Tech notes for easy sonographer-to-physician communication further enhances workflow.

Easy-to-view analytics for your echo peds manager

Department dashboard for real-time statistics allows the department manager to have complete visibility of the work and progress being made by your pediatric echocardiologists. Key metrics presented in the dashboard can then be used to inform better resource allocation and triaging throughout the department.

**Merge Cardio is not FDA-cleared for diagnostic use on mobile devices.*
