

Merge Hemo™

Real-time documentation tool for the cardiac cath lab

**Six
Consecutive
Years!**

Merge Hemo
awarded Category
Leader in Cardiology
Hemodynamics!

2017 Best in KLAS Awards: Software & Services

Your cath lab needs to run more efficiently, but your physicians and staff are hesitant about the transition from old technology. If only there was a solution with a simple user interface geared to cardiac cath labs that improves workflow, analysis and quality throughout your lab.

Now there is.

How We Help You

Merge Hemo provides a single server for multiple facilities and departments and lets you integrate data collection, waveform analysis, inventory control, patient charging and procedure reporting into a single system that makes your cath lab more streamlined, efficient and cost-effective. What's more, the touch-screen interface and user-defined workflow ease the transition for physicians and staff.

MERGE
An IBM Company

Merge Hemo

automates your cath lab process into an electronic patient record with our simplified touch-screen interface and automated reporting. With Merge Hemo you can...

Automatically pre-populate physician clinical reports with relevant hemodynamic data

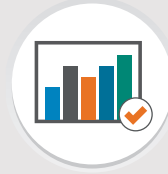

Visualize your entire cath lab department (including pre and post holding) on a single screen via the Departmental Overview Board

Leverage the cost savings and improved access to patient data with a single server that supports multiple facilities and departments

Experience real-time patient monitoring including EtCO₂, Apnea, Pleth, SpO₂ HR

Capture up to 100 percent of the data required by the ACC for the CathPCI registry

Merge Cardiology Solution Suite

Merge Cardio™

Access and manage your patients' digital integrated cardiovascular record from a centralized, web-enabled system that lets you streamline report generation and distribution.

Merge Hemo™

Document the hemodynamic workflow and data collection in your cath lab into a digital patient record using a simplified touch screen interface and automated reporting.

Merge Cardiology Solutions

Merge Cardiology Solutions provide a single web-based view of a patient's complete cardio record from all modalities and access to simplified reporting tools, so physicians can get information faster, reports are quick and consistent, and procedures are done more efficiently.

For more than 25 years, Merge Cardiology Solutions have been developed through a partnership with cardiologists and clinical staff, providing systems and tools with workflow and reporting that physicians are familiar with and comfortable using. This makes adoption of these systems successful, so hospitals, labs and patients can benefit from the efficiencies and cost savings that come from best-of-breed information and imaging solutions.

The Merge Cardiology Solution seamlessly integrates with the industry's largest health information systems and EHRs for interoperable image exchange, a key component of an overall strategy to provide secure and timely access to patient information regardless of location and affiliation.

HEMO-6909, Rev 3.0
