

iConnect[®] Cloud Archive

Store and access medical images securely in the cloud

**More than
83%** of hospitals
and health systems
are using the
cloud now.

Each year, countless hours and dollars are spent archiving diagnostic images. A single image can require 2GB or more in storage and regulations can require that image data be stored for years. If only you could store images efficiently and cost-effectively without sacrificing access or security.

Now you can.

How We Help You

iConnect Cloud Archive provides a long-term, cloud-based storage option. Images are stored securely, in multiple locations and are accessible anywhere, any time. And as your storage needs grow, you can simply add capacity in the cloud instead of adding onsite storage hardware, management and bandwidth.

iConnect Cloud Archive

allows users to securely store and access medical images through the cloud.

With iConnect Cloud Archive you can...

Store any medical image, including both the active copy and the disaster recovery copy

Access images whenever and from where ever you need

Reduce costs by paying only for the capacity you need

Reduce IT storage management and support costs

Protect data through built-in backups & disaster recovery

Merge Interoperability Solution Suite

iConnect® Enterprise Archive

A vendor neutral archive (VNA) to create an enterprise imaging strategy.

iConnect® Access Universal Viewer*

A zero-download, diagnostic quality image and XDS viewer for referring physicians.

iConnect® Access Image Sharing

Limited-license module to efficiently view and share DICOM, non-DICOM and relevant prior images and upload CDs.

iConnect® Network Services

An advanced imaging network that enables the exchange of imaging information electronically to meet MU2.

iConnect® Cloud Archive

A cloud-based image storage and management solution.

*iConnect Access is not FDA-cleared for diagnostic use on mobile devices.

Merge Interoperability Solutions

The iConnect Enterprise Clinical Platform is the only comprehensive solution for collecting, archiving, viewing, sharing and exchanging images—anywhere, any time—and enables enterprise imaging to reduce or eliminate barriers in healthcare efficiency. True interoperable image exchange is a key component to deliver secure and timely access to patient information regardless of location and affiliation. This reduction in time and cost is beneficial to healthcare providers, physicians and patients.

With iConnect, you can leverage existing applications, and widely-used web and healthcare technology standards to create a vendor-neutral interoperable environment. Providers and physicians benefit from the platform's scalability, from simple image viewing to enterprise-level management and integration of diverse image sources and applications.
