

iCNS Results

A results delivery solution that provides access to reports from any device

\$2M the potential value per physician in referral revenue to a healthcare organization

With the number of specialists and referrals exploding, hospitals and imaging centers need to ensure that they are doing all they can to grow the loyalty of their referrers. As referral sources increasingly adopt IT applications to run their businesses, their demand for efficiency in electronic transmission of clinical messaging has grown. Healthcare organizations are searching for the means to improve collaboration and ultimately patient care.

Are you worried about getting left behind and losing those referrals?

How We Help You

iCNS Results leverages existing technology in the enterprise to provide real-time results distribution to referring physicians' desktops or devices. The unique aspect of this technology includes the ability for the referring physician to access the actual diagnostic-quality images through a link embedded in the actual report. These reports can be delivered directly into the EHR system of the referring physician, and are also available for them to access online.

iConnect Network Services Results

is part of an advanced interoperability network that allows you to electronically manage referrals with any provider anywhere, and includes the capability to deliver reports with links to diagnostic quality images. With iCNS Results you can...

Deliver results real time to referring physicians, improving physician turnaround time

Interoperate with most of the industry-leading EHRs through emerging standards and strategic partnerships

Simplify referring providers' access to results by providing them online

Drive revenue cycle improvements that result from better referrer relationships

Enable physicians to view exam images in diagnostic quality to improve treatment timelines

iCNS Offerings

iCNS Orders

An interoperability solution to simplify patient referrals

iCNS Authorize

An automated process for insurance preauthorization

iCNS Results

An electronic distribution system for delivery of exam results

iCNS Results

The iCNS Results system, delivers radiology exam results directly into your customers EHR and to an online portal that is accessible from anywhere and any device. Results can also be delivered to an online portal for the convenience of the referrer. Additionally, the reports include links to diagnostic-quality images that can be easily accessed by the referring physician*. This pay-as-you-go flexible solution comes with no upfront capital expenditures and no ongoing monthly subscription commitment. Result delivery can be configured by location.

There is no hardware to install and there are no upfront fees, so getting started is easy. The addition of the iCNS Orders and iCNS Authorize systems enable the formation of a complete and automated referral management system for image-intensive specialists, strengthening relationships with referrers and increasing the rate of referrals.

iConnect Network Services is not FDA-cleared for diagnostic use on mobile devices.

*Diagnostic quality images only if viewed on a diagnostic quality display
