

# Merge RIS™

An outpatient radiology EHR designed to meet Meaningful Use and industry mandates within radiology workflow

An estimated 90% of radiologists are eligible for Meaningful Use incentive payments from the CMS, according to the American College of Radiology

You want a radiology electronic health record (EHR) that is certified for Meaningful Use (MU) and ICD-10 ready. At the same time, you want a radiology information system (RIS) that streamlines your office and gives you tools to connect with referring physicians and patients.

Now you can do both.

## How We Help You

Merge RIS provides a 2014 Complete Certified EHR for MU with fully integrated workflows and enhanced functionality. Merge RIS lets you meet MU requirements while streamlining your workflow and improving productivity, giving you the ability to build solid and advantageous relationships with your referring physicians, market partners and patients.

# Merge RIS

stores, manages and distributes patient radiology information with a comprehensive system that meets Meaningful Use. With Merge RIS you can...

Streamline workflows with a fully integrated radiology EHR

Ensure that your entire clinical workflow can accommodate ICD-10 changes

Efficiently expand your business with centralized admin tools

Empower patients and increase patient communication with enhanced portal

Build new interoperability with your referral and partner providers

## Merge Radiology Solution Suite

### Merge PACS™

A real-time picture archiving communication system.
