

# Merge Financials™

A practice management solution to automate the back office for medical specialties including radiology, anesthesiology and pathology

With cuts to Medicare funding for imaging scans, bundled payments and other financial challenges, radiology practices and imaging centers, more than ever before, need to increase revenue capture.

Decreasing reimbursements and ever changing payor regulations generate daunting challenges to imaging organizations.

A robust and adaptive financial system is needed to support imaging practices with their growth either internally or through external partnerships.

### Merge Financial as a competitive advantage

Merge Financials helps reduce denials and increase collections and offers dual coding in ICD-9 and ICD-10. Moreover, Merge Financials is very flexible managing multiple tax identifications in one database and enabling the creation of multiple configurable work queues to fit your organizational challenges. Merge Financials is also vendor agnostic and integrates with any RIS while bringing synergies with Merge RIS™.

# Merge Financials

automates your back office with a billing system that improves revenue cycle management. With Merge Financials you can...

Achieve shorter days in accounts receivable by producing clean, easily trackable claims and statements

Quickly code to ICD-10 and ICD-9 to submit claims in most current ANSI formats

Reduce claims errors and improve practice performance reporting and monitoring

Reduce collection costs by improving the efficiency of billing staff

Track claims and follow-up on denials and low pays
