Merge PACS™

An enterprise picture archiving communication system

According to the American Society of Radiologic Technologies, about **7 out of every 10** Americans undergo some type of radiologic procedure annually.

You need a scalable PACS that supports a distributed workforce and delivers operational efficiencies through web-based access, common worklists, and comprehensive workflows. You will benefit from an updated PACS that improves your workflow to help you grow your business.

Now you can.

How We Help You

Merge PACS can help your organization gain a competitive advantage by supporting the changing organizational and workflow structures of varied healthcare organizations, whether a radiology practice or entire IDN. Optimizing your Radiologists reading efficiency by ensuring each study is read by an appropriate team member, ultimately improves study turn around times and improves quality. Tight integration with VNAs, EHRs, and other systems enables Merge PACS to provide value throughout your enterprise.

MERGE

An IBM® Company

Merge PACS

provides a central hub for managing and viewing your studies, while enabling access to remote users via the web, and the common worklists enable efficient sub-specialty reading from remote locations. .With Merge PACS you can…

Expand functionality with fully integrated workstation (3D, Mammo Tomosynthesis and PET/CT/MR/ fusion)	Composite worklists deliver efficient high volume reading	Enable easy access to images, regardless of the referring physician's physical location with web-based PACS	Instant access to full depth of your archive with iConnect® Enterprise Archive	Maintain compliance and manage control with physician credentialing and licensure

Merge Enterprise Solution Suite

Merge Cardio™
A cardiology image and information management system that supports all modalities.

iConnect® Enterprise Archive
A vendor neutral archive (VNA) to create an enterprise imaging strategy.

*iConnect® Access**
A zero-download, diagnostic quality image and XDS viewer for referring physicians.

Merge RIS™
An outpatient radiology information system designed to meet Meaningful Use.

Merge Financials™
A practice management solution to automate the back office.

Merge CADstream®
Improve MRI study analysis and reporting with automated and standardized processing.

Merge Radiology Solutions

Merge Radiology Solutions provide a suite of products for the entire radiology business. From the modality to the front office to the back office, Merge Radiology Solutions provide more efficient workflow, access to archived images and the functionality to meet Meaningful Use.

Merge Enterprise Solution Suite includes Radiology, Cardiology, VNA, and universal viewing and image sharing. Merge delivers the entire imaging suite for the enterprise, whether you are a hospital, IDN, or radiology practice.

Merge has been delivering Radiology Solutions for more than 20 years. Using Merge Radiology Solutions, hospitals, imaging centers, physicians and patients have benefitted from the efficiencies and cost savings that come from best-of-breed imaging and information solutions.

Merge Healthcare's Merge PACS 6.6 is 2014 Edition compliant and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of the U.S. Department of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.

Merge PACS 6.6 holds Certificate No. 12022013-2305-6 and was certified on 12/02/2013, effective date 2014 Edition. Drummond Group is accredited by ANSI and approved by ONC for the ONC HIT Certification Program to certify: Complete EHR, EHR Module (all), and Certification of other types of HIT for which the Secretary has adopted certification criteria under Subpart C of 45 CFR. Certification requires Merge PACS 6.6 or higher.

Licensing and implementation of the functionality and content covered by this certification will require ongoing and/or one-time license and/or service fees covering the right to use the in-scope solutions, support, and requested standard implementation, integration, and consulting services. Interface implementation will require one-time costs and/or ongoing service fees. An upgrade to Merge PACS v6.6 or Merge OrthoPACS v6.0 is available to all existing Merge PACS or Merge OrthoPACS customers with an extended Maintenance Agreement at no additional charge specifically due to this new feature.

*iConnect Access is not FDA-cleared for diagnostic use on mobile devices.
