

# Merge eMix Medical Image Exchange

## A SECURE CLOUD SOLUTION FOR FAST AND EASY IMAGE AND INFORMATION DISTRIBUTION ANYTIME, ANYWHERE

eMix is a vendor-neutral solution to securely share medical images and reports between healthcare facilities, physicians, and patients with speed and simplicity. Physicians are able to make better care decisions and improve patient outcomes through easy access to patient images, no matter the point of origin. The risk of unnecessary radiation exposure from duplicate exams can also be reduced as a result. The right information available at the right time means proper care decisions for the patient.

**Receive Patient Information Securely**—Allow patients to easily upload medical images to your website or portal with push-button simplicity.

**View Images in a Browser**—View medical images using the Merge eMix zero-download viewer. Access images from anywhere or anyone.

**Send and Receive from Your PACS**—Connect eMix to your PACS to automatically push and pull DICOM files.

**Minimize IT Overhead**—Eliminate the need to establish and maintain custom secure connectivity and interfaces between facilities.

### Secure Web Link

Allow your patients to upload images to you through your website, facilitating quick HIPAA-compliant image transfers.

100% web-based

## Secure

HIPAA compliant  
Authorized Access  
Secure login  
SSL

## Cost Effective

Subscription model  
No CapEx  
No CD/DVDs

### Why Choose eMix?

“The ability to have patients or other healthcare facilities upload images directly through our website is a compelling proposition. Any individual – patient, doctor, or clinical staff – with access will be able to use eMix to send us radiological images and files.”

**Adam Kielski**

*Director of Enterprise Imaging  
for Seattle Children's Hospital*

### Use Cases

**Referring Physicians**—Specialists like radiologists, orthopedists, neurologists, oncologists, and spine surgeons can see patients from referring providers in multiple care systems quickly, without waiting for physical media.

**Comparison Images**—Prior relevant medical information can be quickly provided to support comparison studies, evaluating the changes to a patient's condition and ultimately improving the quality of care.

**Second Opinion Service**—Patients seeking a second opinion can conveniently upload their diagnostic imaging studies so that an interpretation can easily be conducted remotely and results quickly provided.

**Facility to Facility Image Exchange**—Patient exams can be transferred quickly and easily between facilities, whether they're within a regional network or part of the larger eMix community of over 600 healthcare organizations.
